Lahore, Pakistan

About

Detail-oriented Software Engineering student with a solid foundation in programming, data science, and blockchain technology. Experienced in content writing and passionate about applying innovative solutions to real-world problems. Currently developing a blockchain-based fake product identifier system. Adept at creating structured, user-focused content and collaborating in both technical and non-technical roles.

Education

Bachelor of Science in Software Engineering

UMT

CGPA: 3.38 | (July 2024-Ongoing)

Professional Experience

IT Intern

Central Park Teaching Hospital

August 2023- October 2023

- Supported staff members in their daily tasks, reducing workload burden and allowing for increased focus on higher-priority assignments.
- Analyzed problems and worked with teams to develop solutions.
- Contributed to a positive team environment by collaborating with fellow interns on group projects and presentations.

Teacher Assistance

UMT

March 2022 - February 2023

- Assisted in grading, lab setup, and tutoring for foundational computing courses.
- Conducted sessions to clarify programming concepts for undergrads.

Skills & Competencies

Python

HTML, CSS, JavaScript

Blockchain Fundamentals

Content Writing and Blogging

Git and GitHub

Academic Projects

- Blockchain-Based Product Authenticator (Ongoing)

Developing a blockchain system using QR codes and smart contracts to verify product authenticity and reduce counterfeiting.

- Twitter Sentiment Analysis

Created a sentiment classifier for Pfizer-related tweets using Kaggle data; compared ML algorithms for accuracy.

- Election Prediction (Data Science)

Built a predictive model for election results using historical and economic data with AI-based validation.

- E-commerce Website

Developed a full-stack online store with user login, cart, and secure checkout features.
